Purchasing Department

December 12, 2014

RFP No.: 14-15/08 Emergency Notification System

ADDENDUM No. 2

Questions

1. The RFP requires the ability to deliver to public address systems and digital signage systems. Is the District currently using these systems to address the population?

Reply: A public address system is not currently in place. A digital signage system is in the pre-construction phase. It will be operational in the summer of 2015. The manufacturer of the sign to be installed is Daktronics Galaxypro 20mm Revolution Series Video Board. Further details can be found at the District website: Bid No. 13-14/16 District-Wide Signage, Phase II

2. In exhibit A section 7 subsection D (7d) the requirement for DIACAP compliance is specified. In this RFP is DIACAP compatibility mandatory for award? If so can you tell me any specific details as to the purpose of the DIACAP compliance for this particular award?

Reply: In order to implement the most robust, scalable, and compliant emergency notification system for the Peralta, we expect the potential vendor to demonstrate support for at least one or more of the EMNS industry mandatory standards listed in Exhibit A, Section 7, Sub-Section D. Awarding is based on a totality of responses and considerations are not solely based on DIACAP industry standards. However, integration of an industry standard as it relates how security and risk management is applied to information technology systems is important as we strive to meet governmental regulations; such as the Cleary Act, etc.

3. Can the tables for Exhibits A, B & C be distributed in Word format?

Reply: The tables have been posted to the District website. However, the source document has only Exhibit A in Word format; the others were inserted as images.
