Tips for Searching the Schedule of Classes

1. Click on “Search for Classes”
2. Select a Term and click “Go”.

3. Choose a Course Subject and click on the Additional Search Criteria to narrow your search results.
4. You have additional search options including, meeting time, day of week, instructor, and college.

5. Click “Search”

Below is an example of a class search for CIS 1 at Merritt College.
The results for this search. To view the class detail, click on the section information.

Understanding Your Class Search Results

- The first letter represents the college (Alameda, Berkeley, Laney, Merritt)
- The number represents the section number for that college
- LEC or LAB indicates this is either a lecture or lab component
- The five-digit number is the class code
Many courses, particularly in the science and vocational areas, have both lecture and lab components. Both components are required. Enroll in the lab component and you will be automatically enrolled in the lecture component.
