

How to Change my Passport Password

You can change your password only if you have set up your Security Question and Answer.

- a) Login to PASSPORT
- b) Click "Change My Password"

- c) Enter password information in the corresponding field and click the Change Password button

A screenshot of the "Change Password" form in the Passport application. The word "Passport" is at the top left. The form title "Change Password" is in a bold blue font. Below the title, the user's information is displayed: "User ID: BUPE8874" and "Description: PERALTA,BUBBA". There are three password input fields, each preceded by an asterisk: "*Current Password:", "*New Password:", and "*Confirm Password:". Each field contains a series of black dots representing masked characters. At the bottom of the form is a light blue button labeled "Change Password".

- d) After you see your password successfully change message. Click the OK button to return to your PASSPORT main page.
