<i>Deactivation Codes:</i>		
<i>Expired not currently used</i>	<i>Deactivation Code</i>	
<i>Terminated Contract or</i>		
<i>Employment is ended</i>	<i>Email</i>	

The following information, from the Remote Access Policy, is intended to assist site staff in identifying the required site Authorizing Manager.

1. Remote Access classifications are:

- |                           |  |
|---------------------------|--|
| General Use               | Allows access to specific resources through WebVPN.  |
| Specified Systems Use     | Allows access to specific systems through IPSEC VPN.   |
| IT Administration – Basic | Allows access to site networks and systems through IPSEC VPN.  |
| IT Administration – ERP   | Allows access to networks and systems comprising the ERP back end through two factor authentication and IPSEC VPN. |

*Connection to all remote access systems is password protected and encrypted.*

2. Authorization by the following Enterprise Managers is required for Remote Access:

- |                           |  |
|---------------------------|--|
| General Use               | IT Resource Users who have already been authorized according to the Account Access Policy are automatically provided with General Use Remote Access.   |
| Specified Systems Use     | Management for area served by the specified system. For example, Remote Access for the Library Online Catalog system is authorized by the librarian currently managing that system, as designated by the District Librarian Group. |
| IT Administration – Basic | Site Management and District Information Technology Management.  |
| IT Administration – ERP   | District Information Technology Management.  |
