

DTC GOALS 2011-12 Survey Results

1. Establish technology/computer refresh policy for the district and get Board approval. Policy should include equipment standards, leasing options and timellines.	2. Establish viable and efficient procurement IT process.	3. Establish identity/authentication management policies and procedures, and implement technology to support that.	4. Institutionalize Distance Education at the district level.	5. Institutionalize use of end-device management system at multiple levels.	6. Develop transparent ongoing process for budget and technology planning and allocation.	7. Develop system for designating and moving surplus electronics.	8. Standarize tech support structures across all colleges (guidelines for minimum number of support based on college needs).	9. Elevate technology use throughout the district (including support for students with disabilites).	10. Clarify intellectual property rights, especially as it pertains to Distance Education and lecture capture.
