Please see my recommendations in caps, since my mail version will not allow colors:

The DTC recommends that the Office of General Services clearly articulate and consult with the District and Campus representatives (I.T. and manAgers) during the initial PLANNING and ongoing phases of any building projects (renovations and/or new construction), to ensure technology planning and essential functionality requirements are integrated into EVERY PHASE OF the building planning AND CONSTRUCTION process.

Subject: Motion on Building Projects

Hello Everyone-

Please review the below motion that will be voted on at the next DTC meeting. Please provide any comments to "reply all" so that this can be accomplished expeditiously at the next meeting in May.

The DTC recommends that the Office of General Services clearly articulate and consult with the District and Campus representatives (I.T. and managers) representatives on during the initial and ongoing phases of any building projects (renovations and/or new construction) to ensure technology planning and essential functionality requirements are is integrated into the building planning process.

Thanks for all you input, but please "re-write" the motion as you would like for it to appear before the DTC at its next meeting.

Regards;

Dr J~
