

Extending PeopleSoft Enterprise

Cardiff Intelligent Documents provide a complimentary unified business process and document interface to PeopleSoft Enterprise

PeopleSoft Enterprise is among the most widely adopted enterprise application platforms for Human Capital Management and touches many other parts of the enterprise. This pervasive adoption, coupled with the associated IT investment, has led organizations to look for ways to leverage PeopleSoft to help automate all employee related processes such as employee onboarding, enrollment, employee action documentation and others. However, organizations are challenged by the fact that many of these employee-related business processes involve multiple business systems, of which PeopleSoft is only one of many, and touch enterprise wide users without direct access to PeopleSoft. Additionally, the IT task of adapting or upgrading processes and interfaces programmed within PeopleSoft to adjust to changing business conditions provides significant challenges.

Cardiff Intelligent Documents provide a complementary unified business process and document interface to PeopleSoft based on a services oriented architecture (SOA). Cardiff allows IT and business developers to easily design, deploy and manage processes and reusable process components that integrate automatically with PeopleSoft and tie in all other necessary business systems and information repositories. In addition, Cardiff Intelligent Documents enable the development of documents and forms that can be deployed and distributed via paper, electronic and mobile devices, providing instant access for the entire enterprise to processes that use PeopleSoft.

Cardiff Intelligent Documents can be connected to your PeopleSoft backend applications, including:

- Human Capital Management
- Asset Lifecycle Management
- Campus Solutions
- Customer Relationship Management
- Enterprise Performance Management
- Enterprise Service Automation (Project Management) Financial Management
- Supplier Relationship Management (Procurement)
- Supply Chain Management

Cardiff's Intelligent Document solutions focus on streamlining and simplifying the myriad of complex connections between the people, documents and the processes that are critical to business. With a flexible architecture and the ability to process paper documents, online and mobile information, the Cardiff solution extends the power of existing business systems, such as PeopleSoft, in a way that enhances their value, buffers massive upgrade requirements and makes them easier for people to work with. The result is smoother processing for your customers and staff, dramatically reduced cost of data entry, and complete visibility to process status at every point in the cycle.

The embedded intelligence in the Cardiff solution ensures the accuracy of the information collected and automatic understanding of the next step in the process while allowing for human decision points and exception handling. With the integration of Autonomy's advanced content technologies, Cardiff provides insight and control across in-process activities and unstructured information. Having a better

Applications

- New Hire & Termination Paperwork
- Employment applications, resumes, tax forms, benefits enrollment, IT user access forms
- Employee status change documents to include annual performance reviews, payroll changes, timesheets
- Exit documents related to IT user change forms, benefit cancellation, exit forms

understanding of information and how people use that information enables real-time action and improved decision-making. When applied across the enterprise, Cardiff Intelligent Document solutions give organizations the ability to anticipate, react and execute faster and better than their competition.

About Cardiff

Cardiff (www.cardiff.com) is a leading provider of software for intelligent document solutions that unify people, paper and process. Cardiff serves more than 8,000 customers worldwide, including many in the financial services, pharmaceutical, healthcare, education, government and manufacturing industries. Cardiff is an Autonomy Group company (LSE: AU. or AU.L).
