Waterproofing Repairs

Laney College
900 Fallon Street
Oakland, CA 94607

SCOPE OF WORK

The work includes the full waterproofing of the sloped areas of the roof and the installation of new waterproofing membranes. The work will be performed in accordance with the approved drawings and specifications. The contractor is required to provide all necessary labor, materials, and equipment to complete the work as specified.

1. Prepare the sloped areas for waterproofing.
2. Install the waterproofing membranes as specified.
3. Ensure complete coverage and adhesion of the membranes.
4. Provide a protective coating to the membranes.
5. Complete the work in accordance with the approved drawings and specifications.

WALKWAY FINISH GRADING NOTES

1. Surface grade of walkway shall be the same as the floor.
2. Surface finish of walkway shall be smooth and non-skid.
3. Drainage shall be directed to the proper storm drain area.
4. Adjacent areas shall be protected from water damage.
5. Work to be completed within the existing footprint.
