22. Consider Approval to Enter into an Agreement with Mondo USA, Inc. (Mondo) to Mitigate the Deterioration of District-wide Tracks at Laney College, College of Alameda and Merritt College Presenter: Vice Chancellor Ikharo Approval is requested to enter into an agreement with Mondo USA, Inc. to mitigate the deterioration of district-wide tracks at Laney College, College of Alameda and Merritt College, in the amount not-to-exceed \$1,400,000. This agreement is an exception to competitive bidding that is allowable pursuant to Shore v. Central Contra Costa Sanitary District (1962) 208 Cal.App.2d 465 and Graydon v. Pasadena Development Agency (1980) 104 Cal.App.3d 631. The District and Mondo entered into mediation, since all three tracks in the District suffered a production defect because Mondo used a red dye (a non-Mondo product), which when mixed with the Mondo surface material created a chemical reaction that was deleterious to the tracks. This reaction caused the untimely deterioration of all track surfaces. The premature deterioration consisting of brittleness, dryness, and substantial chipping of the surface layers occurred within the Mondo five-year warranty period. Additionally the defect affected the college's track and training program and caused a complete alteration of the college's training program. Peralta and Mondo mediated the dispute and reached the following agreement effective September 24, 2013, subject to the approval of the Chancellor and Board of Trustees. Under the Settlement Agreement and Mutual General Release, Mondo's scope of work shall include but is not limited to the following: Removal of the existing track surface, and manufacture, supply and install a new track surface, track and field line and event marking using a minimum 13.5 mm thick Super-X Performance track surfacing system with hexagonal backing. Installation shall be performed by expert specialized proprietary certified installers assisted by general

laborers. Removal and disposal of the existing track surfacing and preparation/leveling of the exposed asphalt base suitable to receive the new track surfacing. All asphalt slabs to receive track surfacing must be installed, on a minimum 12-mil polyethylene moisture barrier membrane, in accordance with accepted industry standards to protect the asphalt from infiltration of water from the sub-grade. Install a topical moisture reduction barrier (TMRB) to protect the asphalt from infiltration of water from natural or artificial causes. Use Aquafin Vaportight Coat SG2 applied at a rate of 160 sq. ft. per 2.1 gallon kit. Commence resurfacing work on the tracks by Mondo as soon as possible. The critical path for the work at each school is four weeks. The track resurfacing project for each school, including the track and field line and event marking, shall be completed no later than the dates stipulated in the agreement. Comply with all applicable California project labor agreement (PLA) and prevailing wage requirements.
